One of our important activities is Research and Study at the grassroot level. Information obtained through primary documentation is taken back to the relE?vant community for verification before it is disseminated among wider masses because we believe in authenticity. For the same reason, intensive surveys are conducted at the grassroot level to unfold true stories. Commensurate with our concern for realisation of child rights and our focus on Child Education, we undertake studies on the relevant issues, such as Govt. Education Policy - Implementation and School Situation etc. Detailed analysis of information and indepth research is done in order to expose a true-to-life picture ofthe society at the grassroot level.
