West Bengal Education Network believes in sharing views, experiences, resources among the partners and learning lessons from each other. These are the key strategies adopted in order to achieve our goal. Frequently we organize meetings with our partners and our alliance for sharing our views and experience so that every one of us can get enriched and benefited. Sometimes we participate in a meeting or a program organized by other groups for the purpose of equipping ourselves and building a mutually beneficial relationship. We also share our experience and information with them. Documentation is done at the partners' level and we try to share the case studies mutually, so that the boundaries of our accumulated wisdom extends continuously.
